

## PFAS DECLARATION

Per- and polyfluoroalkyl substances (PFASs, also perfluorinated alkylated substances) are synthetic organofluorine chemical compounds that have multiple fluorine atoms attached to an alkyl chain.

This group of chemicals contains thousands of substances. They are persistent in nature and can cause severe health risks including various types of cancer.

PFOA and PFOS belong to the PFAS sub group of perfluoro surfactants; Perfluorooctanoic acid (PFOA) is a perfluorinated carboxylic acid used as industrial surfactant in chemical processes and as a material feedstock. PFOA molecule contains both hydrophilic, hydrophobic and lipophobic groups.

Perfluorooctanesulfonic acid (PFOS) is a fluoro surfactant used earlier in numerous stain repellents. It was added to Annex B of the Stockholm Convention on Persistent Organic Pollutants in May 2009.

### Declaration

Neither Euroquartz Ltd nor its suppliers are using any of the above mentioned synthetic organofluorine chemical compounds as raw material and are not contained within any of the products supplied.
